### **DETAILED ACTION**

1. According to the "Amendment" received 20 December 2004, claims 44, 54, 64 and 67 have been amended; claims 45, 46, 55, and 60 have been canceled; and claims 69-76 have been added and the title has been changed.

### ***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 47, line 1, "46" was changed to -- 44 --.

In claim 55, line 1, "55" was changed to -- 54 --.

3. Authorization for this examiner's amendment was given in a telephone interview with Jonathon Blanchard on May 19, 2005.

### ***Response to Arguments***

4. Applicant's Remarks received 20 December 2004 have been fully considered and are persuasive.

***Allowable Subject Matter***

5. Claims 44, 47-54, 56-59 and 61-76 are allowed.

6. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 44, the prior art fails to teach or fairly suggest a method for fabricating a SPM comprising forming a structural layer on a substrate with a sacrificial layer between the structure and the substrate, forming an adhesion layer on the structural layer, forming a handle on the adhesion layer and selectively removing the structural layer from the substrate.

Claims 47-53, 61, 75 and 76 are allowed by virtue of their dependency on claim 44.

Regarding independent claims 54 and 64, the prior art fails to teach or fairly suggest a method for fabricating SPM tips or an apparatus comprising SPM tips wherein the tip and the beam are different non-polymeric materials and specific polymers, such as elastomers, siloxanes, imides, and parylenes, which are not the epoxy-based photoresists materials.

Claims 56-59, 62, 63, 71 and 74 are allowed by virtue of their dependency on claim 54.

Claims 65-69 and 73 are allowed by virtue of their dependency on claim 64

Regarding independent claims 70, 72, and the prior art fails to teach or fairly suggest the tip and beam to be made from the same material wherein the material a

non-polymeric material selected from specific polymers, such as elastomers, siloxanes, imides, and parylenes, which are not the epoxy-based photoresists.

The main feature that separates the invention apart from prior art is the use of materials that are on-polymeric materials elected from specific polymers, such as elastomers, siloxanes, imides, and parylenes, which are not the epoxy-based photoresists.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance"
